

BEM750SF System Floor Edge Banded Panel

Heavy Grade

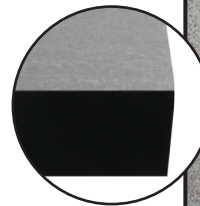

The panel consists of a high grade FSC® certified 30mm high density particle board core in a sandwich construction with steel top and bottom sheet. This then has a full depth ABS edge band applied creating a fully encapsulated panel to be laid with complete electrical continuity and has a high resistance to damage. This is a System Floors replica panel designed to fit into existing floors where the substructure is not to be changed. It is a 750mm x 750mm panel and the underside has drilled corners to suit the System Floor lugs present on the Pedestal head. These holes are foil lined to preserve the panels Class O spread of flame rating.

Product	Panel Grade	Classification	Safety Factor	Ultimate Load	Panel Thickness (Nominal)	System Weight (Typical)
BEM750SF	Heavy	5/A/3/2	3x	> 10.0kN	33mm	35kg/m ²

Certification

The panel is fully tested to the BSEN12825:2001 5/A/3/2 specification and is fully compliant. The Permaflor BEM750SF panels have a 3 times working load safety factor, Class "O" spread of flame resistance and a 1 year warranty.

Full FSC® accreditation No FSC-ACC-008 TT-COC-003493.

Full Depth ABS Edging

Galvanised steel top and bottom sheet

Finish

All of the Permaflor edge banded panels can have a wide range of factory bonded finishes that include wood, ceramic tile, carpet, high pressure laminate and vinyl. All of the edge banded factory bonded panels can be perforated for air flow. Whatever your requirement, Permaflor will have the flooring solution to suit you.

Manufacture

All panels are manufactured in our facility in the UK, which allows us to offer total flexibility whilst maintaining the highest possible quality standard and ensures fast reaction and a reliable service. Materials used are sourced from high quality suppliers and use renewable, sustainable sources and suppliers wherever possible. We can also offer a bespoke service and specialise in replicating and reproducing existing raised floors.
